

Dermascan Machines – Locations and Availability for Loaning

Northwest Region

Susan Zies – Wood County - Wood County has a machine; however, it is housed and owned by the Wood County commissioners, so it is not available for loan to other counties.

Nancy Stehulak - Henry County owns a machine, and it could be borrowed.

Donna Green – Erie County - I have one. I used to let one of the local hospitals use it, but I gave them info on where to purchase their own and they haven't asked for the last couple of years. I'm assuming they bought their own.

Katie LaPlant - Ottawa and Sandusky Counties- I have a Dermascan. Others are free to borrow if they need/want to. I should add that it is "housed" in Ottawa County (Oak Harbor).

Northeast Region

Melinda Hill – Wayne County - I have one from our regional office that is now located in the Wayne County office. I also have an old display available.

Southwest Region

Kathy Green – Clark County - I have a Dermascan in Clark County, which can be borrowed.

Brenda Sandman-Stover - Greene County has a Dermascan machine that we own. I do let other counties borrow it, they will need to contact me to make arrangements.

Barb Hennard – Mercer County - We have a Dermascan machine in Mercer County that was paid for by a OSU Extension/Health Department grant years ago. It is housed at our health department because the hospital as well as, I use the machine. It is generally not available for other people to use although occasionally Darke Co requests it's use through me. I am available to use the machine outside Mercer County if someone would like for me to help, as long as the health department or hospital doesn't need it.

Kristen Corry - Butler County has two Dermascan machines. We are willing to loan one and sell the other.

Southeast Region

Lisa Barlage – Ross County - The Ross County Office has a machine that used to belong to our District office. It is available for loan. Contact Lisa Barlage at barlage.7@osu.edu

Treva Williams – Scioto County -We have a Dermascan machine here in Scioto County and it is available for others to use.

Amanda Bohlen – Washington County has a Dermascan machine. They are willing to loan it out.

OSU Campus

OSU Extension has three Dermascan Machines, which are available for loan from Dee Jepsen's office. Dee's email address is jepsen.4@osu.edu and phone is 614-292-6008. Dee is located on the second floor of the Agriculture Engineering Building. Dee's office also has displays and materials to do displays. These can be checked out through her office.
