Ohio SNAP-Ed Adult & Teen Programs
Shift to Healthier Choices

Task Topic: MyPlate

Task Title: Shift to Healthier Choices

Teaching Message(s):
- Use MyPlate to make healthy food choices with a limited budget.
- Eat at least one kind of vegetable daily.
- Eat at least one kind of fruit daily.
- Eat fruits and vegetables of different colors.
- Eat plant-based protein foods like beans, lentils, soy, or nuts.
- When consuming dairy products like milk, cheese, yogurt, etc., choose low fat or fat free dairy food options.
- When consuming grain products like bread, pasta, rice, cereal, etc., choose whole grain options.
- When consuming meat like beef, pork, chicken, or seafood, choose lean or low fat options.
- Be physically active for at least 30 minutes most days of the week.

Resources: Adapted from ChooseMyPlate.gov and the Dietary Guidelines for Americans

Objectives for the Task:
1. List one health benefit of making small shifts in the diet.
2. Name two examples of shifts that help one meet the recommendations of the Dietary Guidelines for Americans.
3. Define the term “nutrient density” and give an example of a nutrient-dense food.

Materials Needed for the Task (including Handouts):
- Fact sheet – Strategies for Selecting Nutrient Dense Choices
- Fact sheet – Shift to Healthier Food & Beverage Choices
- Meal station labels (printed on card stock)
- Masking tape
- Food models (see next page)

General Materials List:
- Flip chart paper
- Thought box
- Highlighters
- VOICE principles
- Post-it notes
- Markers
- Masking tape
- Participant evaluation forms
- Index cards
- Pens
- Name tags

THE OHIO STATE UNIVERSITY

OHIO SNAP-Ed PROGRAM

Revised 09/13/16
**Preparation:**
- Make copies of all fact sheets, one for each participant.
- Set up four meal stations on large tables around the room. Label the first station “Breakfast,” the second one “Lunch,” the third one “Dinner,” and the fourth one “Snacks.” Using masking tape, divide each station into 3 sections. Label the first section “Typical Choices,” the second section “Nutrient-Dense Choices,” and the third section “We recommend this SHIFT”. Set out food models according to the outline below:

<table>
<thead>
<tr>
<th>Meal Station: __________________________</th>
<th>Typical Choices</th>
<th>Nutrient-Dense Choices</th>
<th>We Recommend this SHIFT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Breakfast</td>
<td>Doughnut or sweet roll</td>
<td>Whole wheat waffle</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Pancake or bagel</td>
<td>Oatmeal</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Corn flakes cereal</td>
<td>Bran cereal</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Whole milk</td>
<td>1% or skim milk</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Sausage or bacon</td>
<td>Eggs</td>
<td></td>
</tr>
<tr>
<td>Lunch</td>
<td>White bread</td>
<td>Whole wheat bread</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Bologna or hot dog</td>
<td>Turkey or ham</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Chicken nuggets</td>
<td>Fish or shrimp</td>
<td></td>
</tr>
<tr>
<td></td>
<td>American cheese</td>
<td>String cheese</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Iceberg lettuce</td>
<td>Spinach</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Sweetened applesauce</td>
<td>Whole apple</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Canned fruit (heavy syrup)</td>
<td>Berries (any kind)</td>
<td>whole banana</td>
</tr>

</table>

**Key Points to Review:**
- Introduce yourself. Give brief description of the program (program name, length of sessions, duration of program).
- Include your purpose as the facilitator (i.e. to introduce ideas that are supported by research, to give them the tools to make informed decisions about areas that affect their health & nutritional needs, and to identify topics that might be covered based on the curricula used in the program).
- Review the V.O.I.C.E. Principles.
- Ask participants to sign in on the SNAP-Ed sign-in sheet.
- Remember to pass out the appropriate participant evaluation form at the end of the session, making sure to read the questions out loud to the participants.

**Transition:**

Last time we met, we learned about …. You were asked to …. Who would like to share about their experiences with this activity?

Today we’ll be discussing making shifts in our food and beverage choices. Making small shifts in what we consume can add up to big health benefits over time. Likewise, making shifts in our daily activity regimen can add to these benefits. One example of a shift in activity might be to park 10 spaces away from the store so that we can add more steps to our daily routine. Let’s do a small physical activity to start off today’s lesson. **Invite participants to engage in a group physical activity. Ideas include stretching exercises that are suitable for your participant group, walking or marching in place, or playing a game like “balloon hot potato” where participants must keep 2-3 inflated balloons from touching the ground.**

**Physical activity guidelines can be found at the following websites:**

**Anchor**

Think of a time you had to make a change in your life. Maybe you had to start setting your alarm 10 minutes earlier to ensure you could get out the door on time. Or perhaps you decided to take a class to learn a new skill. Describe this change to the people sitting nearby. Was it a big change that took patience and planning? Or was it a small change that you found easy to make?

Who would like to share their example with the group?

**Add**

Making changes to your eating patterns can be overwhelming for many people. That is why it is important to understand that every food choice is an **opportunity to move toward a healthy eating pattern.** One small shift at each meal may not be very noticeable, but added up over the course of a day, a week, a month, or even a year, these small shifts can become very powerful.

The *Dietary Guidelines for Americans* recommends shifting toward **nutrient-dense** options in each food group. What does this mean, exactly? A nutrient-dense food or beverage is one that provides a lot of **nutrients** but relatively few calories. Look for items that contain vitamins, minerals, complex carbohydrates, lean protein, and healthy fats. Nutrient-dense foods typically do not contain added sugars, saturated fat, or excess sodium. What are some examples of nutrient-dense foods in each of the five food groups? *(Refer participants to the*}
Fact Sheet – Strategies for Selecting Nutrient Dense Choices.

Consider that about 75% of Americans have eating patterns that are low in vegetables, fruits, dairy, and oils. Furthermore, most Americans exceed the recommendations for added sugars, saturated fats, and sodium. By making small changes toward selecting nutrient-dense choices, we can begin to shift our eating patterns to be healthier and, consequently, reduce our risk of chronic disease.

Apply

Divide the participants into four groups. Instruct each group to go to a meal station.

Around the room are four meal stations, one for breakfast, lunch, dinner, and snacks. Each station is divided into 3 sections. On the left side of the station are foods that are typical choices, but not necessarily nutrient-dense. In the middle are nutrient-dense foods. Working in your groups, SHIFT a typical food choice to a more nutrient-dense option. Place your selections on the right side of the station. Each group should visit all four meal stations, shifting a typical food or beverage choice to a more nutrient-dense choice.

Allow participants 10-15 minutes for this activity.

Who would like to share one of the SHIFTS their group recommended? Why did you recommend this shift?

Away

Pass out a copy of the fact sheet – Shift to Healthier Food and Beverage Choices to each participant. Looking at this fact sheet I just passed out, identify one opportunity you have to make a healthy food or beverage shift. Write down an example of a shift you are willing to try over the next week.

Facilitator’s Notes:

Facilitator’s Checklist:

☐ Have I gathered all of the pertinent materials needed for the lesson?
☐ Did I spend the requisite amount of time covering each targeted message?
☐ Did I apply the principles of adult learning to my program?
☐ Did I create a comfortable and functional learning atmosphere?
☐ Did I fill out a Program Log with the necessary program information?
☐ Did I ensure that all participants signed the sign-in sheet?
☐ Did I read the survey instrument out loud to the participants?
☐ Did I collect all requisite survey instruments needed for today’s lesson?
Here’s some good news: Eating healthier doesn’t mean you have to give up all the foods you love. It doesn’t have to be confusing or complicated either. The 2015–2020 Dietary Guidelines has a better approach—make small shifts in the foods you eat. Here’s how to do it.

What Are Healthy Shifts?

It’s simple. When you can, swap out a food or ingredient for a healthier option. For example, you could:

- **Shift from whole milk to low-fat milk in your breakfast cereal**
- **Shift from soda with added sugars to water during lunch**
- **Shift from a cream-based pasta dish to one with a lighter sauce and more vegetables for dinner**

How Will Making Shifts Help?

- Healthy eating patterns can help prevent chronic diseases like obesity, heart disease, high blood pressure, and Type 2 diabetes.
- Shifting to healthier choices doesn’t mean you have to change your whole eating pattern. Shifts can be easier to stick with over time—you’re just making small changes to the way you’re already eating.

Make Shifts Throughout the Day

You have a chance to make a healthier choice whenever you:

- Open your fridge for a snack
- Shop in the grocery store
- Stand at a vending machine
- Pack a lunch
- Look at a menu in a restaurant
- Cook a favorite recipe

Take advantage of these everyday opportunities to make a shift. Everything you eat and drink matters. Over time, little changes in the foods and drinks you choose can have big health benefits.
Try Out These **Shifts**

The *Dietary Guidelines* has key recommendations for how we can all improve our eating patterns. The shifts below will help you stay on track.

### How to Eat More Whole Grains:
- Choose whole-wheat bread instead of white
- Have popcorn for a snack instead of potato chips (just leave out the butter)

### How to Cut Down on Saturated Fats:
- Twice a week, have seafood instead of fatty cuts of meat for dinner
- When you’re making chili or stew, reduce the amount of meat and add more beans and vegetables

### How to Cut Down on Added Sugars:
- Give your kids 100% juice or water instead of fruit punch
- Have a homemade fruit smoothie instead of ice cream

### How to Cut Down on Sodium (Salt):
- Switch to unsalted nuts
- Shift from regular canned soups to low-sodium

### How to Use Oils Instead of Solid Fats:
- Dip your whole-wheat bread in olive oil instead of spreading on butter
- Choose an oil-based salad dressing instead of cream-based

**What Shift Will You Make Today?**

Want to learn more about shifts and how to find a healthy eating pattern that works for your family? Check out [ChooseMyPlate.gov](http://ChooseMyPlate.gov), which has more information from the *Dietary Guidelines*, online tools, recipes, and more.
### Strategies for Selecting Nutrient-Dense Choices

#### Shift to consume more vegetables

**Strategies:**
- Swap out a high-calorie side dish with steamed veggies
- Add more veggies to your mixed dishes (casseroles, soups, etc.)
- Serve a green salad at dinner
- Snack on fresh veggies

**Nutrient-dense selections:**
- All vegetables are good choices!
- Dark green
- Red & orange
- Beans & peas
- Starchy
- Other

#### Shift to consume more fruits

**Strategies:**
- Choose fruit as your snack
- Add fruit to cereal or salads
- Serve fruit as dessert or as a dessert topping

**Nutrient-dense selections:**
- Fresh fruit
- Canned fruits (in 100% fruit juice or with no added sugar)
- Frozen fruit

#### Shift to make half of all grains consumed be whole grains

**Strategies:**
- Choose foods that have “whole grains” listed as the first ingredient
- Choose whole grain versions of bread, rice, pasta & crackers
- Limit refined grain desserts

**Nutrient-dense selections:**
- Whole grain bread or pasta
- Brown rice
- Quinoa
- Oats/oatmeal
- Plain popcorn

#### Shift to eating a variety of nutrient-dense protein foods

**Strategies:**
- Serve seafood twice a week
- Eat meats without breading
- Substitute plant proteins (like legumes) for half the meat in a mixed dish
- Grill instead of fry your meat

**Nutrient-dense selections:**
- Non-breaded seafood
- Chicken or turkey (no skin)
- 90% lean beef or pork
- Beans (any kind), peas, lentils
- Eggs
- Nuts

#### Shift to consuming nutrient-dense dairy products

**Strategies:**
- Drink lower-fat milk with meals
- Prepare sauces & dips with yogurt instead of sour cream
- Swap out high-fat dairy products with lower-fat options

**Nutrient-dense selections:**
- Fat-free or low-fat milk
- Fortified soy beverages
- Plain yogurt (lower-fat versions)
- Cheese made with 2% milk
- Frozen yogurt
**Shift from solid fats to oils & to reduce saturated fats to <10% of calories**

**Strategies:**
- Cook with oils instead of solid fats like butter or shortening
- Eat foods that are natural sources of oils (nuts, seafood)
- Limit foods made with hydrogenated oils or solid fats

**Nutrient-dense selections:**
- Nuts
- Seafood
- Vegetable oils (non-hydrogenated)
- Oil-based spreads
- Lean meats/poultry

**Shift to reduce added sugars to <10% of calories**

**Strategies:**
- Drink unsweetened beverages or those low in added sugars
- Drink sugar-sweetened drinks less often
- Choose unsweetened or no-sugar-added canned fruits or yogurt
- Eat smaller portions of sweet snacks or desserts

**Shift food choices to reduce sodium intake**

**Strategies:**
- Choose lower-sodium packaged foods
- Eat fresh poultry or seafood instead of processed versions
- Limit sauces, mixes, and “instant” food products
- Flavor your meals with herbs instead of salt

One shift I can make to my diet is _____________________________________________
